BRAVA ACE

The only sweeper for TENNIS and PADEL
that leaves the field unbeatably clean.

sweepers & scrubbers

A SINGLE MACHINE FOR THE CLEANING OF TENNIS AND PADEL COURTS!

A perfect cleaning of playing surfaces is not just a way to make visible the quality of your service and the respect for your customers: it is also the best way to ensure a long term efficiency of your tennis and padel courts.

Brava ACE is the sweeper created by RCM, in collaboration with professional padel and tennis instructors, in order to ensure a quick and safe maintenance of the playing surfaces. Everything with a single machine. Thanks to a special hopper, Brava ACE redistributes sand to the ground by keeping dirt and the thin nylon filaments of the balls so that they do not disperse in the air. For any other use outside of padel, it will be enough to replace its special hopper with the standard one for exteriors, interiors and tennis courts.

Perfect for INDOOR and OUTDOOR facilities

- + Cleaning and hygiene
- + Savings in maintenance
- + Satisfied customers

Brava ACE is suitable for surfaces in: synthetic grass, cement, synthetic.

Agile and versatile for every application, also outside the court.

Brava ACE, with a cleaning width of 78 cm, is driven by an electric engine and a battery that ensures an autonomy of 4 hours.

Tough but contained in the dimensions, Brava ACE is easy to manoeuvre, also through pedestrian doors and tight spaces. Its huge suction power and filter able to retain raised dust make it a highly valuable ally also for the cleaning of internal surfaces of sports facilities and club houses.

Special filters to keep silicon and nylon dust of balls.

Central brush for the collection of coarse dirt and nylon filaments of balls. With its bristles it "combs" synthetic grass filaments.

Side brush for the removal of sand on the sidelines.

Special hopper that keeps dirt by uniformly redistributing the filling sand on padel courts.

Standard hopper for the cleaning of tennis courts, walkways, parking spaces and all internal and external environments.

RCM is not only for TENNIS and PADEL.

The cleaning of surfaces where any kind of sports is practised, is at the base of athletes safety and their performances.
